ROHITH PK

Civil Engineer/Graduate Structural Engineer
Ragasree (H), Mundayad, Kannur, Kerala, India-670594
er.rohithpk@gmail.com | +91 6238881550

PROFESSIONAL SUMMARY

Graduate Structural Engineer currently pursuing M.Tech in Structural Engineering, with strong academic and project-based experience in bridge analysis and structural design. Proficient in finite element modelling of bridges, wind and seismic load analysis, and use of MIDAS Civil, ETABS, and Abaqus. Hands-on exposure to RCC design, load combinations, structural behaviour. Seeking entry-level roles in bridge design, structural analysis, and infrastructure engineering.

EXPERIENCE

Structural Engineering Intern

Larsen & Toubro (L&T), Chennai, Tamil Nadu
May 2025 – Jul 2025

- Modelled and analysed a 25-storey high-rise tower with podium using ETABS, including gravity, wind, and seismic load cases.
- Performed lateral load analysis under wind and seismic actions, strengthening understanding of load paths and structural behaviour.
- Assisted in RCC member design and detailing accordance with IS 456, reinforcing design coordination skills essential for large infrastructure projects.
- Gained exposure to multidisciplinary coordination and real-world structural engineering practices in high-rise projects.

EDUCATION

M.Tech in Computer-Aided Structural Engineering

Government Engineering College, Kannur
2024 - Present

B.Tech in Civil Engineering

College of Engineering & Technology-Payyanur (CGPA 7.3)
2019 – 2023

TECHNICAL SKILLS

- **Engineering Software:** MIDAS Civil, ETABS, AutoCAD, STAAD Pro, Revit, Abaqus
- **Structural Engineering**: Bridge design and analysis, RCC structures, Wind and seismic structural behaviour analysis.
- **Productivity Tools:** MS Office Suite (Word, Excel, PowerPoint)
- **Project Management:** Budget management, resource allocation
- **Data Analysis & GIS:** GIS tools for mapping and spatial analysis

ACADEMIC PROJECTS

Wind Load Performance of Box Girder Bridges with UHPC Joints

- Performed finite element analysis of a continuous box girder bridge with precast segments and UHPC joints to evaluate wind load behaviour.
- Analysed wind-induced responses including displacement, bending moment, shear force, and stress distribution under varying wind conditions.
- Studied the influence of UHPC joints on global bridge behaviour under varying wind load conditions.
- Compared structural performance of UHPC joints with conventional joints and proposed design improvements for enhanced aerodynamic stability.

LULC Change Analysis & Flood Susceptibility Mapping of Kanichar Panchayat Using GIS

- Conducted a detailed study on land-use and land-cover (LULC) changes.
- Developed flood susceptibility maps to assist in local disaster management planning.
- Utilized GIS tools to analyse spatial and temporal data effectively.

LANGUAGES

English (Fluent) Hindi (Fluent) Malayalam (Native) Tamil (Intermediate)

DECLARATION

I hereby declare that the above-mentioned information is true to the best of my knowledge. Given the opportunity, I will dedicate my efforts to excel in all assigned tasks.
